

YONAH CRAFT

Supplies:

Pattern and instructions

One 9 x 12 piece of felt

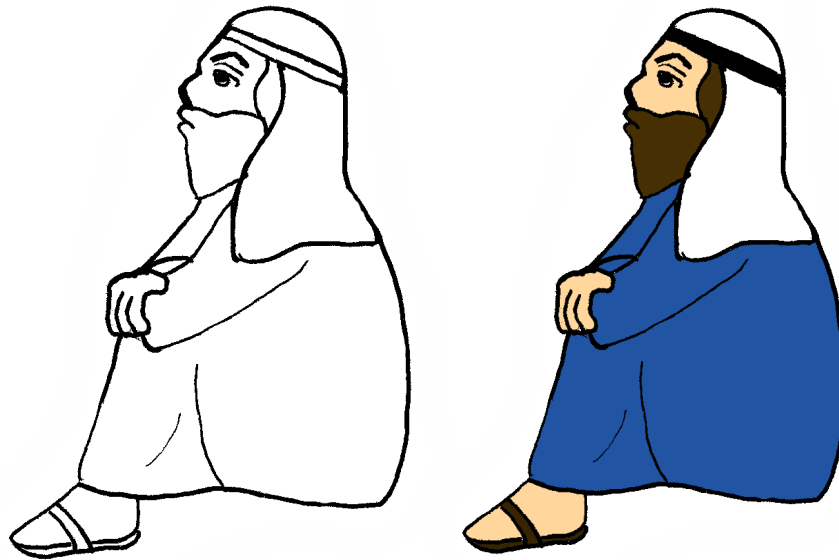

Polyester fiberfill

Two googly eyes

Scissors

Hot glue gun

Glue sticks

- 1) To avoid movement while cutting, tack pattern page to top of felt sheet, lining up the bottom of the felt with the bottom of the pattern page.
- 2) Cut pieces from felt. Be sure to extend your cut of pattern piece B to the end of the felt so it will be 12 inches long.
- 3) Lay A flat on surface.
- 4) Glue B to A at the "TAIL" end.
- 5) Fold B back, referring to the "fold" line in pattern piece.
- 6) Take C and glue the flat side of it to A, starting with the tapered end at the fold and working towards what will be the front of the whale.
- 7) Glue the top side of C to B, again starting at the taper and working toward the curve, but stop at the curve.
- 8) Take D and glue the flat side of it to A, starting with the tapered end at the fold and working towards what will be the front of the whale.
- 9) Glue the top side of D to B, again starting at the taper and working toward the curve, but stop at the curve.
- 10) In the opening between A and B, fill the body of the whale with stuffing.
- 11) Glue the rest of C to B around the curve.
- 12) Glue the rest of D to B around the curve.
- 13) Overlap B onto A at the front and glue it in place.
- 14) Glue F pieces (fins) to the E piece, referring to the pattern for placement.
- 15) Glue the edges of E to the bottom of the whale, and leave the front open for the pocket.
- 16) Glue the eyes on each side of the whale.
- 17) Cut Yonah and color if needed and your craft is complete. To make Yonah stiffer, you could glue him to a piece of stiff cardboard, or laminate him.
